

Exercise 2.12

(a) `int double = 3.14;`

(b) `int _;`

(c) `int catch-22;`

(d) `int 1_or_2 = 1;`

(e) `double Double = 3.14;`

(a) is invalid. `double` is a keyword.

(b) is valid.

(c) is invalid. `'-'` is an operator.

(d) is invalid. Identifiers must start with letters or underscore, not numbers.

(e) is valid.
