Exercise 1.6

```
1   std::cout << "The sum of " << v1;
2   << " and " << v2;
3   << " is " << v1 + v2 << std::endl;
```

Line 2 and Line 3 do not have a left operand on the left of the first <<
operator. In order to fix it, we can put std::cout operand at the start of Line
2 and Line 3 as follows:

```
1   std::cout << "The sum of " << v1;
2   std::cout << " and " << v2;
3   std::cout << " is " << v1 + v2 << std::endl;
```
